From Frustration to Control - What Wonderz Solves

are stuck in platform dependency. Wonderz turns these weaknesses into growth

❑ **Fragmented tools**

❑ All-in-one: CMS, app builder, analytics and paywall in one platform
Apps, monetization & analytics are all disconnected.

❑ **Poor monetization**

❑ Wonderz apps generate up to 700x more revenue per user.
YouTube pays <1€/1,000 views, ad-based, unreliable.

❑ **No audience ownership**

❑ Direct access to subscribers, email & CRM included.
Creators can't talk to or retarget their fans.

❑ **No control**

❑ You control UX, pricing, release cycles & updates.
Algorithm changes kill reach and income overnight.

❑ **No optimization tools**

❑ Built-in experiments, real-time analytics & cohort metrics.
No A/B testing, no data, no growth levers.

The Problem

Creators have no ownership. Platforms take all the value.

❑ **Fragmented Tools**

Apps, analytics, monetization – all separate, all complex

❑ **No Control**

Algorithm shifts kill reach overnight

Poor Monetization

uTube pays <1€/1,000 views, unpredictable, no dependencies

⚙️ **No Customization**

No deep content UX, change pricing, improve conversion

❑ **No Customer Access**

Creators never own their audience – no CRM, no data

High Platform Fees

YouTube & Apple take 30–45 % off the top

Market Opportunity - Kids & Family Creator Economy

The global industry is shifting from passive streaming to interactive, owned experiences

□ Global Market Size

TAM: \$119B across Kids Apps, Games, EdTech, Streaming

□ Addressable Segment (SAM)

~\$8B in D2C children's apps and subscription content

□ Industry Shift

Linear TV budgets for kids content dropped -32% since 2022

□ Rising Demand

Families want safe, ad-free, screen-time controlled experiences

Creator Boom

Kids creators = fastest-growing YouTube segment, but platform-bound

Product - All-in-One Platform for D2C Creator A

From content upload to conversion - one system, built for creators.

□ No-Code App Kit

Launch native iOS, Android, Web & TV apps in 2-4 weeks - no developers needed.

□ Real-Time Content Control

Edit UX, launch new sections, update content live via dashboard.

□ Built-in Growth Tools

Experiment with pricing, paywalls, conversion flows and see instant results.

□ Native Unity3D & Games Support

Integrate games alongside video & audio content seamlessly.

□ Kid-Safe by Design

COPPA/GDPR compliant, curated templates, ad-free, parent dashboard.

Competitive Landscape - Where Wonderz Stands Out

Only Wonderz combines native app tech, creator tooling, and kid-friendly UX.

❑ YouTube / Vimeo

Platform control, ad-based, no ownership, no paywalls

❑ CMS / Web builders

No native apps, poor media experience, no subscriptions

❑ OTT platforms

Expensive, slow setup, not creator-friendly

❑ Wonderz

All-in-one: No-code apps, UX control, growth tools, kid-safe UX

Business Model - Scalable SaaS + Revenue Share

Aligned with creator success - predictable revenue, scalable upside.

□ Two models

Basic: €1.000/month + €1 per app subscriber

Growth: 35 % revenue share incl. growth support

□ Recurring revenue

ARR grows with app adoption, not engineering effort

□ Aligned incentives

The better the app performs, the more we earn

□ Upside potential

Revenue share enables Wonderz to participate in scale wins

□ High retention

0 % churn so far, high LTV due to deep platform integration

Business Model - Transparent Pricing, Scalable Upsell

offers a transparent pricing structure that adapts to customer needs and scale. Choose between flat-fee SaaS and a performance-based revenue share – with optional enterprise add-ons.

Feature	Basic Model	Growth Model
Pricing	€1,000/month + €1 per app subscriber	35 % of net app revenue
Support	Standard support	Dedicated growth support included
Ideal for	Smaller creators with predictable revenue	High-growth brands & IP holders

Enterprise Option (upon request):

For large media brands with >10K users per app. Starting at €10,000/month per app + 35 % revenue share. Includes SLAs, custom integration support, and launch acceleration.

Go-Market Strategy - From Creators to Global IP

Targeting the world's most influential kids content creators and IP owners.

□ Phase 1: Anchor Creators

Signed top-tier YouTube brands (Skyship, El Reino Infantil, Bounce Patrol) as reference cases.

□ Phase 2: Mid-Market & IP Studios

Scale to independent studios, publishers, and kids media companies with proven demand.

□ Phase 3: Enterprise & Licensing

Approach large global brands (e.g. Hasbro, Animaj) for multi-app, multi-country rollout.

S

reputation, outbound via strategic partnerships, and content at trade events (e.g. MIPCOM, Spielwaren

□ Moat

Product-led growth, network effects via game templates, and operational excellence.

Customer Examples - Global Reach & Proof Point

Trusted by world-class kids brands and top-performing YouTube creators.

- Skyship - 45K+ paid users, \$3.5M ARR
- El Reino Infantil - 150M subs, Spanish top IP
- First Media - 18K users migrated from Vimeo
- Bounce Patrol - solo creator, 0€ marketing
 - Cleo & Cuquín - multi-IP D2C rollout

Customer Examples - Global Reach & Proof Point

Trusted by world-class kids brands and top-performing YouTube creators.

- Bounce Patrol - solo creator, 0€ marketing
 - Cleo & Cuquín - multi-IP D2C rollout

Customer Examples - Global Reach & Proof Point

Trusted by world-class kids brands and top-performing YouTube creators.

☐ Skyship (Super Simple Songs)

45,000+ paid app users, \$3.5M+ ARR, 0% churn

☐ El Reino Infantil

Most-viewed Spanish kids brand (>150M YouTube subs) - new app launched via Wonderz

☐ First Media

Migrated 18,000+ subscribers from Vimeo to Wonderz. Enterprise launch in Q3 2025

☐ Bounce Patrol

Grew organically on Wonderz after switching from Vimeo - solo creator, 0 marketing budget

☐ Cleo & Cuquín (Animaj)

From TV to D2C apps - Wonderz supports multi-IP rollout under NDA

User Cohorts - Retention Per Creator Brand

chart shows how many users are still active each month after installing a brand's app.
onstrates both user retention and long-term engagement for each customer brand on the Wonderz pla
le: Skyship retains ~60 % of users after 6 months, while First Media shows rapid recent growth.

Context: Why Creators Need Better Tools

Independent kids & family creators face massive monetization and control challenge

❑ **Low monetization on YouTube**

- Current state: Ad revenue <1€/1,000 views; volatile, not scalable
- Workaround: Some try premium content on Vimeo or YouTube memberships – but uptake is low

❑ **No direct access to audience**

- Current state: Creators don't own emails or data
- Workaround: Some use newsletters, but these aren't tied to content usage or conversion

❑ **High development cost for own app**

- Current state: Custom apps cost €50–200K and take months
- Workaround: Unaffordable and static; no updates or testing

❑ **No optimization or analytics tools**

- Current state: Can't test UX or monetization options
- Workaround: No A/B testing on platforms; creators rely on gut feeling

How Creators Try (and Fail) to Build Their Own App B

❑ Monetizing on YouTube

"I built a huge audience – but I earn less than €100 per million views."

- Platform keeps >55%
- Ads are unreliable
- No pricing control

❑ **Result: Zero scalability, total dependency**

❑ Using Vimeo OTT or Uscreen

"I tried a 'creator app' platform – it looked outdated and was expensive."

- No growth tools
- Not made for kids
- Little UX control

❑ **Result: High churn, low engagement**

❑ Hiring an agency to build a custom app

"We paid €60K+ and waited 6 months. Now we can't update anything."

- Static build
- No analytics
- Locked-in tech stack

❑ **Result: Dead investment, no iteration**

❑ Connecting tools manually (Mailchimp + Dropbox)

"We used Mailchimp + Google Forms + Dropbox."

- Zero integration
- Operational overhead
- No automation
